AMENDED APPLICATION

On May 1, 2006, Utility Source, L.L.C. (the "Company") filed an Application in this Docket. The matter is set for hearing on June 19, 2007.

That Application did not request, nor did Commission Staff recommend, a Tariff for the Company's sale of effluent from the Company's wastewater treatment plant.

Only recently has the Company determined that there could be a market for the disposal of the effluent in a useful manner, specifically for dust control on Coconino County unpaved roads, dust control during construction, or perhaps fire control. The Company believes that such uses would be beneficial to the Company, its customers, potential users and would be a responsible water usage in this area with limited water resources.

With no specific customer, type of use, or quantities known at this time, and because the requests would in all likelihood be for immediate service for which the customer could not wait for another rate case, or even an ARS §40-367 tariff approval, the Company hereby amends its Application by requesting that the Commission authorize an Effluent Water Sale tariff charge in what the Company believes to be a typical effluent rate of \$200.00 per acre foot or \$0.62 per

1 1,000 gallons sold, or such other rate as the Staff or the Commission should deem appropriate.  
2 Any revenue derived from such sales would be minimal, and irregular or non-recurring and  
3 should have no impact on the Company's or Staff's prior analysis in this proceeding.

4 Because there is no numeric or quantitative evidence to support the request, the Company  
5 proposes addressing this matter during its direct presentation at the hearing.

6 Respectfully submitted this 3<sup>rd</sup> day of June 2007.
